TRAFFIC ANALYSIS SURVEY
NORTH VIETNAM, LAOS AND CAMBODIA

The IBM listings of the Traffic Analysis Survey are prepared by NPIC for distribution on a weekly basis and are cumulative from 6 March 1964.

The Traffic Analysis Survey is based on specific routes in Southeast Asia; however, when traffic is observed on an unnumbered route, the entry "UNN" appears under the column "Route Segment." Each listing consists of four parts presented in the following sequence:

Route Segment . . . . . Part I
Country . . . . . Part II
Date . . . . . Part III
Coordinates . . . . . Part IV

All columns are labeled and are self-explanatory except for the route and segment numbers which are explained in a separately distributed route-segment key.
